SEMI-LOADED CALIPERS

Centric Parts’s remanufactured Brake Caliper program sets the industry standard for fill rate, coverage, and quality. With over 3,300 SKUs in stock and a world-class Category Management team, Centric is the partner you need to grow your caliper profits. Our award-winning catalog covers applications all the way from a 1961 Mercedes to a 2019 Audi with plenty in between. Each Centric remanufactured caliper is fully disassembled, inspected and cleaned. All rubber components and phenolic pistons are replaced 100% of the time. Mounting brackets are installed and properly lubricated. All of our calipers are quality-control checked and pressure tested before being placed in the box. Ask for Centric 141-series Semi-Loaded Calipers. Centric Parts continues to set the industry standards for availability, quality and coverage.

From the street to the fleet to the track, brake and emissions systems from the APC Automotive portfolio are built to fit, built to move.
